

Web Report

I have been working to assist with resolving the issues about the domain names and payments for our existing website.

I have continued to research the marketplace and competition and prepare content for our new marketing website.

I have been reticent about committing to expenditure to put the new site online because of the issues there have been around payments for the existing site and I need to be sure expenditure will be refunded.

I have attached a copy of the plan which was presented at the National AGM in February. The National AGM voted near unanimously to endorse this plan. This now needs to be confirmed by the NEC as our national development strategy.

Thanks – Jeff
